

**NIBC Infrastructure Fund purchases 46 MW wind farm portfolio in Germany**

*The Hague, July 8th, 2010* - NIBC European Infrastructure Fund (NEIF) has acquired a portfolio of three operational wind farms with a combined capacity of 46 MW. The wind portfolios are located in the Berlin area. They are equipped in majority with Vestas turbines and became operational in the period 2003-2006.

As developer and operator of the wind farms, European Energy has agreed to stay on as a minority shareholder to provide a.o. for efficient management of the portfolio going forward.

*Peregrine Corporate Finance acted as exclusive financial advisor to NIBC Infrastructure Fund in this transaction.*
